CORPUS

On the above date and time, officers responded to the above area reference major traffic injury traffic collision.

Upon arrival, while speaking to the driver officers recognized several objective signs and symptoms of alcohol intoxication from the driver. The driver admitted driving his vehicle. The driver agreed to conduct a Field Sobriety Test. The driver was arrested for D.U.I. and was booked at a local jail facility for the charges.

Refer to the narrative for further.

ASSIGNMENT/OBSERVATION:

On March 26, 2026, at approximately 1500 hours, I (Officer T. Lopez Moya) was assigned to the uniform patrol division of the San Bernardino Police Department. I wore my full duty uniform and drove a marked San Bernardino Police Department unit.

At approximately 2039 hours, I was dispatched to Del Rosa and Marshal, reference a major traffic collision. The text of the call stated that there was a Nissan kick and a unknown vehicle pulled over to the side of the road and California Highway Patrol was on scene.

Prior to my arrival, the California Highway Patrol(CHP) (J. Avalos #23645) had the subject out of the vehicle and on the curb because the collision was on the border line. CHP advised me the driver appeared to be under the influence due to having a strong a strong odor of alcohol coming from his mouth. Once I arrived, I observed a pickup truck on the side of the road with damage to the front and a CHP unit behind it with their emergency lights on.

My body-worn camera was activated during this investigation.

DRIVER CONTACT:

I approached the driver and asked him for his first and last name. He verbally identified himself as Garrett Cuellar, DOB 2/16/95 . While speaking to Cuellar, I smelled a strong odor of alcohol coming from his mouth. I also observed Cuellar to have watery eyes, droopy eyes, and he was slurring his words when he talked.

Based on my training and experience, I recognized these objective signs to be symptoms of to be consistent with alcohol intoxication. Additionally I know that alcoholic bervage may cause a person to be dizzy, confused, disorganized, etc. These conditions may cause a hazard for road way and it occupations.

To further determine if Cuellar was impaired by suspected alcohol, I determined that Standardized Field Sobriety Tests should be conducted. I requested Cuellar to complete the explained and demonstrated Standardized Field Sobriety Tests and Standardized Field Sobriety and he agreed to conduct them.

Standardized Field Sobriety Tests (FST):

These tests were completed on the West side walk of Del Rosa Avenue. During the test, it was dark with the patrol white lights on. There was no obstruction in the area during the test. All the times in this investigation are approximate and were obtained using the stopwatch on a wristwatch. All tests were thoroughly explained and demonstrated for Cuellar prior to having them perform each test. Cuellar stated he understood the directions.

These tests can be reviewed on the DUI/Drug Influence Evaluation Report I later submitted to the Records Department at the San Bernardino Police Department.

Lopez Moya	51615	03/26/2026	Y - YES	Reid,	03/30/2026

Eye Examination:

During the eye examination, I noticed Cuellar's pupils were equal in size. As Cuellar's eyes tracked the stimulus from left to right, I noticed their eyes lacked smooth pursuit and had equal tracking. Cuellar's eyes presented distinct and sustained Horizontal Gaze Nystagmus prior to maximum deviation. Cuellar's also presented Vertical Gaze Nystagmus.

Lastly, I checked for convergence; Cuellar's eyes were unable to converge.

Walk and Turn:

Cuellar did not maintain his balance during instructions. Cuellar stopped walking and stepped off line a couple of times. Cuellar also missed heel-to-toe steps during the test. Cuellar did not use his hands to balance, did not count to the right amount of steps, and did not do a proper turn.

One Leg Stand:

During the One Leg Stand, Cuellar put his foot down due to his not being able to keep his balance. Cuellar did not use his hand to balance. Cuellar also did not count the proper way I told him to. I advised Cuellar to count by thousands (1001, 1002, 1003).

DETENTION:

Based on the accumulative evidence and in conjunction with my training and experience, it was my opinion that Cuellar was under the influence of alcohol intoxication while he was operating their motor vehicle. Cuellar was placed under arrest.

TOXICOLOGICAL SAMPLE:

Once detained, Moreno agreed to provide a blood sample.

BLOOD:

Cuellar was transported to the San Bernardino County Sheriff Central Detention Center (CDC). Law Enforcement Medical Services Certified Phlebotomist Technician V. Vasquez #559 responded. At 2219 hours, V. Vasquez withdrew a blood sample from Cuellar at the CDC. The blood sample was later stored as evidence at the San Bernardino Police Department. Blood kit number is 373451.

ARREST:

Cuellar was arrested for VC 23152(a) - Driving under the influence of alcohol, VC 23152(b) - BAC 0.08% or higher, and Cuellar was booked at Central Detention Center.

Lopez Moya	51615	03/26/2026	Y - YES	Reid,	03/30/2026

SUSPECT STATEMENT (Garrett Cuellar DOB 06/20/1987):

On 03/26/26, at approximately 2230 hours, I read Cuellar his Miranda Rights with my Department-issued Miranda Card at the Center Detention Center parking lot. I asked him if he understood the rights I had just read, and Cuellar responded, "Yes". I asked him if he wanted to talk to me about the charges against him, and he answered "yes".

The following is a summary of his statement.

Cuellar stated he was driving and did not see the vehicle in front of him when he crashed. Cuellar also said he was not drinking and did not drink anything that day.

Cuellar did not provide any further question and no further questions were asked.
